More about Selectors

HTML

CSS

Elements

➡ Set equal style for these elements

```
<h1>Our header</h1>
<p>The Blog Post</p>
<div>More Info</div>
```

```
h1 {
    color: red;
}
```

Classes

⇨ Set equal style for elements within the same class

```
<h1 class="blog-post">
Our header</h1>
<p class="blog-post">
The blog post</p>
<div class="blog-post">
More info</div>
```

```
.blog-post {
    color: red;
}
```

Universal

```
<h1>Our header</h1>
<p class="blog-post">The
blog post</p>
```

```
* {
    color: red;
}
```

Rarely use this one!

More about Selectors

	HTML	CSS

IDs	`<h1 id="main-title">Our header</h1>`	`#main-title {`
		`    color: red;`
		`}`

➡️ Set style to one specific element

	HTML	CSS

Attributes	`<button disabled>`
	`    Click`
	`</button>`
		`[disabled] {`
		`    color: red;`
		`}`

➡️ Set equal styles to all elements with attribute(s)
